SOFTWARE ENGINEER

Experienced Full Stack Software Engineer with 3 years of hands-on development experience. Proficient in Python, Django, Angular, and PostgreSQL, with additional expertise in .NET Core, Fast API, SQL and React Native. With a wealth of experiences, I bring a broad skill set to the table, enabling me to adeptly tackle diverse development challenges. Committed to delivering robust and user-friendly applications that significantly contribute to organizational efficiency and success.

KEY COMPETENCIES

Python
Git
Celery

Django
AWS
Restful Apis

PostgreSQL
Angular/React
React Native

PROFESSIONAL EXPERIENCE

- Actively participated in code reviews and provided constructive feedback to improve code quality and maintainability.
- Demonstrated problem-solving skills in troubleshooting and debugging complex issues, ensuring smooth application functionality.
- Collaborated with cross-functional teams to understand project requirements and deliver high-quality solutions within project timelines.
- Specialized in building RESTful APIs following industry best practices for seamless integration with front-end and third-party services.
- Familiar with AWS services such as EC2, S3, and RDS for deploying and managing cloud-based applications.

As a full-stack engineer, I am responsible for the development and maintenance of the entire technology stack of a web application. This includes the front-end (client-side) and back-end (server-side) development, as well as the infrastructure and databases needed to support the application

- Conduct thorough requirements gathering and analysis by actively engaging with clients to understand their needs
- Contributed to the development, implementation, and database architecture of Connect Health, innovating a remote patient monitoring (RPM) solution
- Led end-to-end backend development for AlfaMD, providing comprehensive REST APIs crucial for system functionality. Directed the design and implementation of SQL Server database schemas, tailoring structures to accommodate new features and enhance existing functionalities
- Collaborated closely with project stakeholders to ensure alignment with project objectives.
- Utilized agile methodologies, employing tools such as Jira for sprint planning, ticket grooming, and meeting deadlines effectively
- Managed version control using Git, Bitbucket, and SVN across multiple applications.
- Conduct manual integration and unit testing of developments to ensure bug-free and reliable outcomes.
- Interacted directly with senior leadership and team members to refine project goals, ensuring alignment with client expectations and industry standards

PROJECTS

VenueGPS

- Leading the development and enhancement of VenueGPS, a comprehensive event management platform.
- Utilizing Python and Django for backend development, ensuring robust and scalable application architecture.
- Implementing Celery for efficient task queue management and background job processing.
- Integrating Stripe for seamless payment processing and subscription management.
- Focusing on new feature development and bug fixes to improve user experience and platform reliability.

AlfaMD

- Collaborated with senior developers to design and build the architecture of ALFMD, a AlfaMD isn't just an EHR system; it's a healthcare innovation. With a commitment to seamless user experience, advanced customization features, and unparalleled security, AlfaMD stands at the forefront of technological excellence.
- Played a key role in the initial development phase, contributing to the foundational codebase and system design.
- Engaged in continuous development, implementing new features and enhancements to meet evolving project requirements.
- Focused on maintaining code quality and adhering to best practices throughout the project lifecycle.

Access360

- Spearheaded the development, implementation, and architecture of Connect Health, a groundbreaking Remote Patient Monitoring (RPM) solution. Utilizing Python with FastAPI for the backend, and Angular for the frontend, the integration of advanced technologies was coordinated to deliver a comprehensive healthcare solution.
- Contributed to the implementation and solutions for Patients Registration, patient plan of care, device integration, and monthly billing reports within Connect Health.
- Explored diverse technologies, mastered Git/Bitbucket for version control, and implemented robust access controls, ensuring clear communication and client satisfaction through tailored solutions.

EDUCATION

Superior University (2016-2020)

Bachelor of Science Computer Science • Lahore, Punjab
